

DAQ100 Cluster Finding Status:

StDaqClfMaker:

- * tpc_raw tables -> tphit table
- * Direct substitute for tcl in offline chain
- * Check in to CVS tomorrow

Comparison of Hits:

- * Direct comparison between tcl and clf
- * Good agreement in space/charge between hits

Comparison of Tracks:

- * Hidden tracking parameters in tcl
- * Very good agreement between matched tracks
- * Many tpt pathologies found
- * More details next Wednesday at ITTF MTG

Still To Do:

Turn over StDaqClfMaker to physics oriented QA

- * Manual Calderon (Spectra / Embedding)
- * Sergei Panitkin (HBT)
- * If this goes well, we will need people from other groups
